## Interests

## Summary

Technology Project Manager with expertise in leading large-scale tech projects, aligning business objectives with tech solutions, and driving results through Agile methodologies. Proven ability to manage complex, cross-functional teams to deliver projects on time, within scope, and on budget. Major focus on improve efficiency while always keeping the big picture in mind.

## Experience

**Chief of Staff,** Ice Barrel

January 2024 - Present

Serve as a strategic partner to the CEO, driving initiatives that scale the company efficiently and sustainably. Facilitate the alignment of systems, processes, and team culture with the company's growth.

**Digital Experience Lead,** One Community Church

August 2021 - November 2023

Led, managed, and grew multiple teams of volunteers to maintain & innovate all of the online platforms for a church with a regular attendance of over 15,000 amongst 5 physical & 4 virtual locations.

**Sales Development Representative,** Leadr

December 2020 - July 2021

Primary role was generating qualified leads. To do this I developed sales pipeline, pursued prospective customers, created sales copy, designed sales processes, coached & trained teammates, and more.

**Web Designer/Developer & IT/Business Consultant**

John Hazel Solutions || November 2011 - Present

Overseeing a team of six specialists, I assist organizations to understand their missions more clearly and then bridge the gaps between their mission, their physical & digital faces, and their target audience. Additionally, I help develop & maintain processes, technical infrastructure, and marketing outlets to support their mission.

**IT Director,** Church For All Nations

November 2011 - March 2020

Management Responsibilities: Hired, recruited, and developed staff, interns, and volunteers with a variety of personalities & skill sets. Taught, trained, coached, and mentored them, resulting in valuable relationships as well as confidence in themselves & each other.
Technical Responsibilities: I managed technical infrastructure throughout all locations & departments, innovated systems & processes, and implemented additional technical infrastructure.
